

FORD TRANSIT *Refrigerated* VEHICLES

Mobile Cold Solutions LLC

Mobile Cold Solutions can provide both the insulation and refrigeration unit customizable to your trailer, truck body, and commercial van needs. Our composite insulation package equips your vehicle with a high-strength, durable, yet lightweight solution.

Our **refrigerated vehicles** include:

- **3 inch standard thickness insulation**
Continuous throughout the vehicle, provides higher thermal efficiency.
- **Heavy Duty Composite Cargo Floor**
Durable floor reduces noise, resists standard wear and tear. (ATP floor available also).
- **Floor Drain**
Allows water to drain easily from inside the van
- **Composite Walls and Roof Panels**
All-composite wood free panels, lightweight core provides noise reduction and weight savings compared to traditional materials.
- **Thermo composite liner Surface**
Resistant to rot/corrosion/mildew, lightweight, superior durability, easy maintenance, FDA approved
- **ATP Wall Guard Protection**
Minimizes damage caused by forklifts, pallets, crates and cargo. Heavy duty protection from impacts, dents, and tears.
- **Lightweight Construction**
Allowing more cargo payload and increased fuel efficiency.
- **Faster Pull Down of Temperature**
Uniform insulation thickness throughout the vehicle allows for a faster pull down temperature in the cargo area.
- **Lower Operating Costs**
Refrigeration unit cycles less due to high thermal efficiency
- **2 Year Warranty Standard**
On materials and workmanship
